The company has many offices to serve a big sector; each office has an ID, address and a contact no.
・The owner who is willing to provide his car/s for rent to the office needs to register his full name, national ID as unique identifier and the bank account number to which the company will transfer the money to.
・The owner must apply for car renting in only one office, but an office can have many owners.
・Data about car is ID, model (brand, model name, model year), copy of a valid license, rent amount and car status (Ex: the car status is booked, in maintenance or available)
・Owner can provide the office with one or more cars to rent. In addition, it is not allowed to save a car information that is not related to specified owner.
・In regard to the tenant (the person who pays rent for car usage); the system has to save information about his National ID as unique identifier, copy of a valid driving license to secure the car and a mobile number as a contact.
・A tenant should rent one or more cars and a car can be rented by many tenants.
・When a tenant orders a car, some information about this transaction must be recorded such as the start date for renting the car, the duration and payment method.
